Pitch Your Story for Startup Founders

- Select and structure impactful stories.
- Refine the core message to give clarity and emphasis.
- Expand stage presence for confidence and credibility.
- Edit jargon and excessive technical detail.
- Speak with power, expression and passion.

PITCH YOUR STORY

We educate and encourage founders to become dynamic, expressive communicators in this half day training session led by our specialist trainer, Victoria. Each of the core skills is addressed in small group 'workouts' as we move through a purpose built circuit-style training. Participants will get huge amounts of live practise, peer feedback and direct advice from Victoria. The grand finale is a pitch contest between the participating ventures where they experience the pressure (and payoff) of bringing together their storytelling and stage presence in front of a crowd.

Top benefits of this training:

- Simplify your message to make sure your vision is clear and accessible.
- Match your voice and body language to the message, building trust and engagement.
- Build your confidence in real time through rehearsal, refinement and constructive feedback.
- Learn how to leverage your stories in a way that is memorable, relatable and impactful.

How we are different from other pitch training providers:

- Your world is not our world – Our expertise and approach come from professional theatre work. It's something different and it energises our participants without fail.
- We walk the walk – Your trainer is a working actor with a whole new perspective on how to win over an audience. We share these tools with you.
- We never start with slides – You are your biggest asset when pitching. We work on you – your gravitas, language, pace, expression and more – the slides are the supporting act.
- We keep it playful – we create a relaxed, fun atmosphere where experimenting is the aim and nerves melt away.

“It’s been fantastic to work with Victoria on designing a “Pitch your Story” workshop. She made it fun, dynamic, and insightful to our group, even adjusting the flow of the workshop to the need of the startup founders. In just half a day, we all came out with new tips and a refined story for each of the ventures. Thank you!” – C Guyot, MD, Engie Factory
